## ProPoint™ Vista 200W RGBW

The ProPoint Vista RGBW is an AC line powered, high brightness luminaire. Controllable with DMX512, the ProPoint Vista RGBW is available in 200W and 400W output, 12 beam angle options, standard & custom finishes which can meet the needs for most projects. The daisy chain topology, and direct-wire nature of the fixture via the two integral cable whips allow for simple installation into existing installations and new structures, and is ideal for high-rise and tower illumination.

This product is intended for use in high-quality colored light applications.

### Product Specifications

<b>Model</b>	ProPoint Vista 200W RGBW
<b>Light Source</b>	Discrete LED x 84
<b>Color Range</b>	RGBW (White CCT: 4000K standard) Other White CCT and RGBA available <sup>1</sup>
<b>Beam Angle</b>	3° native <sup>2</sup> ; 5°, 8°, 10°, 15°, 20°, 30°, 40°, 55°, 80°, 50°x10°, 50°x5° via accessory Internal Louver (Standard)
<b>Luminous Flux</b>	12213 lm
<b>Efficacy</b>	60 lm/W
<b>Lumen Maintenance</b>	L <sub>70</sub> @ 25° 81,000 hours
<b>Cover Lens</b>	Tempered Glass
<b>Housing</b>	Die Cast Aluminum
<b>Housing Finish Options</b>	Gray (RAL7015), Black (RAL9005), White (RAL9003)
<b>Adjustment Options</b>	±90° Vertical
<b>Size</b>	689mm x 357.2mm x 271.5mm (27.1" x 14.1" x 10.7")
<b>Weight</b>	22.3 kg (49.17 lbs.)
<b>EPA (sq.ft)</b>	ProPoint Vista 200W: Front: 1.17 Side: 0.63
<b>Regulatory/Product Certifications</b>	cETLus, CE, UKCA, FCC, RoHS, REACH, ASTM B117-16, ANSI 3G, IK08
<b>Operating Temperature</b>	-30°C to +55°C (-22°F to +131°F)
<b>Minimum Starting Temperature</b>	-20°C (-4°F)
<b>Storage Temperature</b>	-40°C to +80°C (-40°F to +176°F)
<b>Environment</b>	IP66 Outdoor, suitable for coastal environments
<b>Humidity</b>	85%, non-condensing

### Electrical Specifications

<b>Input Voltage<sup>3</sup></b>	100-277V <sub>AC</sub> 50/60Hz
<b>Wattage</b>	200W
<b>Power Factor</b>	≥0.9

### System Specifications

<b>Technology</b>	DynaMood®: BeamOne
<b>Power</b>	AC Line
<b>Control</b>	DMX512, RDM Enabled
<b>Power Supply</b>	Integrated

1. No MOQ required. Please consult regional sales office for pricing and lead time.
2. 3° native with actual measurement of avg. 3.8°.
3. Auto-switching. Single phase (line, neutral and ground).

**LED CHARACTERISTICS** Because LEDs are semiconductor devices, their performances are subject to inherent variability commonly found in semiconductor industry. To improve consistency in performance across the same product, LED manufacturers "sort" LEDs into bins according to different preset parameters, such as forward driving voltage, illumination, etc. Whereas binning is a sorting function, it is not a correction process. Inherent variability in the manufacturing process results always in different binning distributions according to different production lots. Traxon uses automatically binned LEDs on its products, thereby minimizing output variations within the model range.

As with all electronic devices, LED output degrades over time – a term called lumen depreciation. This also explains why it is nearly impossible to expect photometric performances of two LED products with different service life spans to be the same. The rate of LED degrade is a complicate function of many factors such as operating efficiency, duration of continuous operation, and more significantly, environmental conditions (ambient temperature for example). If allowed working under optimal operating temperature range and with good ventilation, LED devices enjoy long service lives over conventional light sources. When using/installing LED devices, care should be taken to ensure that the devices will operate within the operating conditions specified in respective product literature.

This product contains a light source of energy efficiency class G to Regulation (EU) No 2019/2015.  
Lumen measurement complies with LM-79-08 standard.  
Lumen maintenance is calculated based on LM-80 compliant measurement.

Spread Lens Frame

- ProPoint Vista fixtures ship with two cable whips: One cable whip for power input, consisting of two wires plus a ground, and one cable whip for DMX512 RDM input/output.
- No more than (32) fixtures on a single DMX512 link, max 300m total (source to last fixture).
- Data cabling from DMX source to first fixture and between subsequent ProPoint Vista fixtures shall be Cat5e UTP or higher (stranded type only) or other cable type suitable for DMX communication. Consult DMX standard for additional guidance.

- Each DMX512 link must be properly terminated to prevent signal reflections.

### General Notes

- All data cabling must adhere to ANSI E1.11-2008 (R2013) – Entertainment Technology – USITT DMX512-A, Asynchronous Serial Digital Data Transmission Standard for Controlling Lighting Equipment and Accessories.
- Fixture is RDM compatible.
- Fixtures allow a universal input of 100V<sub>AC</sub> to 277V<sub>AC</sub>.
- Data termination shall utilize cage clamp terminal blocks, or equivalent. Wire nuts are not permissible and will void warranty.
- The method of line voltage termination, both for data and power, is at the discretion of the installing contractor, and/or engineer. Splicing and/or joining of cables must adhere to all applicable electrical codes.
- Cables must be spliced/joined in a weatherproof enclosure/junction box, which is to be properly rated and provided by others.
