Preamble

The SYMPHOLIGHT Software ("**Software**") is a lighting control software provided in executable format unless explicitly stipulated otherwise for certain software modules. It provides light control, light scene programming, light scene edition and light scene execution features.

The Software can be used in its demonstration version. Subject to procurement of a license key dongle ("**Dongle**"), a hardware USB device which enables dedicated features within the Software on a certain target hardware, the Software can also be in its full version.

The Software is provided together with the related documentation ("**Documentation**"). The Software and the Documentation are provided free of charge.

I. License Grant and License Restrictions; Open Source and Third Party Software

Subject to the terms and conditions of this EULA, You are hereby granted the non-exclusive, non-transferrable, non-sublicensable, worldwide right to (i) use and have used the Software and the Documentation for internal evaluation, test and demonstration purposes, (ii) use and have used the Software and the Documentation for the purpose of simulating and programming light scenes and (iii) to copy, have copied, distribute, have distributed, sublicense and have sublicense the Software and the Documentation to Your customers ("**End Customer(s)**") together with related configuration files, granting the End Customers the right to use and have used the Software together with the Documentation for the sole purpose of light scene programming and light control in its own systems.

Your right to distribute and sublicense the Software as stipulated under (iii) above is subject to the procurement of one (1) Dongle per installation on a target hardware at an End Customer. It is also subject to legally binding, written license agreements the terms and conditions of which are (a) not less stringent than those of this EULA and (b) concluded in a way that OSRAM is a third party beneficiary with respect to the terms and conditions set forth for the licensing and protection of the Software and Documentation.

Other than those explicitly stipulated herein, You are not granted any rights to the Software and the Documentation.

Unless explicitly allowed by applicable mandatory law, you are not entitled to disassemble, reverse engineer, decompile and/or modify the Software or any part thereof. In addition thereto, You must not - and shall prevent others from doing so - disassemble, reverse engineer or decompile the Dongle for any reason other than as allowed according to mandatory law.

You acknowledge and agree that OSRAM provides no warranties and shall have no liability whatsoever in respect of Your possession and/or use of the freeware, shareware or Open Source Software. Regarding such portions of Software, You hereby accept the specific license conditions either being part of the Documentation or otherwise provided by OSRAM ("**Open Source Conditions**"). Upon Your request, OSRAM provides a copy of the source code of the Open Source Software, if required by the Open Source Conditions. To the extent there is a conflict between this EULA and the Open Source Conditions, the terms of the Open Source Conditions shall prevail over the terms and conditions of this EULA with regard to the Open Source Software.

The Software contains third party software modules ("**Third Party Software**"). Such Third Party Software is provided under the terms and conditions as set forth herein unless otherwise explicitly stated herein. With respect to the Third Party Software Sentinel HASP licensed by Safenet, Inc.
